08	Thoughts Pt. III	03:24
09	Thoughts Collide With Stars	02:46

---

### Artist Information

**P for Pepsine** is a lo-fi solo-orchestra based in Lucerne, Switzerland. Repetition is not one of Pepsine's strengths. But all the more the consistency of his own productions. Pepsine literally lives the DIY concept. The distinctive vocals, the typical songwriting and guitar playing as well as a certain nonchalance characterize the songs especially. And of course the combination of analogue instruments and digital gimmicks. With Pepsine you never know exactly what you'll get: catchy singer-songwriter pearls or rather dark, introverted, electronic songs that only reveal their full beauty after several runs. But a constancy remains: Pepsine always stages and celebrates a very special mood in his songs and thus delivers a special listening experience. His productions are mostly created in his home studio or in combination variations at different locations. And this is reflected in a certain intimacy in his songs which cannot be overheard. This is exactly how pop music with an individual character is created.

### Album Information

After an album and an EP **P for Pepsine** from Lucerne delivers with "Thoughts Collide With Stars" his new release. After three pre-release singles in 2020, the whole musical universe of the new album lies on the table. Acoustic indie guitars meet driving electronic beats, soft as well as gloomy strings pair with warm basses and reverberant voices, longing song lyrics blend with the individual mood of each song and together form a huge sound firework! This is joined by the conceptual instrumentals, which connect and hold the songs together by an invisible thread. Despite a little more pop and catchy melodies, Pepsine remains completely true to his DIY concept and also keeps his musical peculiarities fully with this new production. Only mixed and mastered was external. Pepsine presents with his new work warm, melancholic but still multifaceted pop on a somewhat more straightforward way to the listener than on the predecessor "Sunsets EP". Just like that Pepsine continues to be exciting, creating these musical contrasts in his own DIY world and sharing his thoughts with the listener before sending them out into the universe.
